📍 Bagdole, Lalitpur

ABOUT ME

I am a Computer Engineering student passionate about Data Science, Data Analytics, and creating interactive dashboards. I enjoy analyzing data to uncover valuable insights and address real-world challenges. I have experience working with Python, SQL, Pandas, NumPy, and visualization tools for data analysis and dashboard development. Through hands-on projects, I continuously enhance my technical, analytical, and problem-solving abilities while learning new technologies.

EDUCATION

Bachelor in Computer Engineering
Pulchowk Campus, Lalitpur, Nepal
Expected Graduation: 2027

CERTIFICATIONS & COURSEWORK

- CS50: Introduction to computer science
- Data science with python

PROJECTS

Retail Sales EDA with Dashboard

- Performed exploratory data analysis (EDA) on retail sales data using Python and its data analysis libraries.
- Completed analytics workflow, including data collection, database integration, data cleaning, preprocessing, visualization, and dashboard creation.

Book Sales EDA with Dashboard

- Analyzed book sales data to identify sales patterns, customer preferences, and business insights.
- Performed data cleaning, exploratory data analysis (EDA) and created interactive dashboard to visualize important trends such as bestselling books, top-performing genres, customer purchasing behavior, and sales performance over time.

SQL olympics analysis

- Conducted exploratory data analysis on Olympic Games data using SQL.
- Designed and executed analytical queries to identify top-performing athletes, dominant countries, medal trends, and participation statistics across different Olympic years.

CV database system

- Developed a CV Database Management System using SQL and SQLite to efficiently store and manage candidate information such as education, skills, work experience, certifications, and projects.
- Designed a normalized relational database schema with ER modeling and SQL queries to enable organized data storage, quick retrieval, and efficient candidate search functionality.

SKILLS

- **Programming & Tools:** C, C++, Python, HTML, CSS, Java Script (Basic), Django (Basic), SQL, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter Notebook, Git, Excel, Streamlit.
- **Data Science Skills:** Data Cleaning, Data Preprocessing, Machine Learning (Basic), Statistical Analysis, Data Visualization, Interactive Dashboard.
- **Soft Skills:** Problem-Solving, Analytical Thinking, Teamwork, Communication, Adaptability, Time Management
